1080p Up-Conversion

Up-Converts video to 1080p High Definition resolution via HDMI connection. 1080p Up-Conversion delivers crisp clear images.

Progressive Scan

Progressive Scan doubles the vertical resolution of the image resulting in a noticeably sharper picture. Instead of sending a field comprising the odd lines to the screen first, followed by the field with the even lines, both fields are written at one time. A full image is created instantaneously using the maximum resolution. Your eye perceives a sharper picture with no line structure.
